

Hello my fellow students my name is Robert McClain and I want to represent Cuyamaca college as Student Trustee. My main goal as Student Trustee will be to make communication between the student body and the board easier. As Student Trustee it will be my job to voice your opinions and concerns to the board during meetings and to make sure that all student interests are represented, especially those who don't have nearly enough representation normally. Achieving my goal of making the communication between the administrative side of campus and the students will take the help of many, we will use surveys and events hosted on campus to listen to concerns, and then formulate a plan to bring it up to the board that will bring about the most successful changes. A trustee is the intermediary between the students, those on the governing board, and federal legislators; in order to successfully do my job I will have to create and maintain relationships with all sides understanding what each needs. Skills that I developed while working as an office coordinator will help me to better understand what is needed. If I am elected I will do my absolute best to help everyone on campus succeed by helping to foster an environment of learning and safety.

Salutations Fellow Coyote
