

WHY CHOOSE THIS CAREER PATHWAY?

Automotive technology is an industry in demand, so shift your career into gear through Cuyamaca College's industry-recognized Automotive Technology program. The hands-on curriculum stays ahead of the curve by including hybrid and electric vehicles in the stable of vehicles on which students practice. Students attending Ford and General Motors' programs are employed in the industry while learning the latest in automotive technology.

This is a solid job market. Ten-year projections through 2026 by the federal Bureau of Labor Statistics puts job growth at 7 percent for automotive service technicians and mechanics, for a total of nearly 800,000 new jobs.

Cuyamaca College's Master Automotive Service Excellence Automotive Technology Program emphasizes practical experience in simulated shop conditions. It's among the best in the region and will help prepare you for a career in the field.

ABOUT CAREER EDUCATION

The Grossmont-Cuyamaca Community College District offers scores of career education programs in a wide spectrum of areas such as business office technology, web design, culinary arts and more. Classes cost just \$46 per unit, and many programs may lead to employment as quickly as within a year.

Projections through 2025 indicate a need for 1.5 million workers with some postsecondary education (but less than a bachelor's degree). Career education is vital to bridging this gap because it provides a pathway to good-paying jobs and supplies the hands-on, practical training employers demand.

So what are you waiting for?

HOW TO APPLY AND ENROLL

- Find class schedules and links to apply at gcccd.edu/now
- Log into **WebAdvisor** and register for classes
- Pay fees and **attend your classes!**

WHAT STUDENTS ARE SAYING

"Because of Cuyamaca College's GM-ASEP program which provides on-the-job training and classroom instruction on working on GM vehicles, I was hired as a lube technician at De La Fuente Cadillac. There were other job applicants, but my training through Cuyamaca gave me an advantage. I want to be a GM master technician."
-Majid Maroki, Automotive Technology student
