

**Cuyamaca College**  
**CTE Tutoring: CADD, CD, CIS, CISCO, CS, GD, and WWTR**  
**Fall 2012 - Spring 2013**

This report shows course retention rates and course success rates for CTE students at Cuyamaca College who used the Tutoring Center as compared to CTE students that did not use the Tutoring Center. Outcome and demographic data are from the research database, and CTE tutoring attendance data were provided by the Tutoring Center. In the report, outcome and demographic data for all CTE students are summarized first, followed by outcome data separated by discipline and course for CADD, CD, CIS, CISCO, CS, GD, and WWTR. Courses that had no CTE tutoring students enrolled were excluded, and courses with fewer than five CTE tutoring students were combined into an “other” category for each discipline.

### Summary of Findings

- Overall, the rates of course retention and course success for CTE students who used the Tutoring Center were significantly higher than for CTE students who did not use the Tutoring Center.
- For CADD students, the rates of course retention were significantly higher for students who used CTE tutoring services than for CADD students that did use CTE tutoring services, however their rates of course success were not significantly different.
- CD, CIS, CISCO, and GD students who used CTE tutoring services had significantly higher rates of course retention and rates of course success than students in these courses that did not use CTE tutoring services.
- The outcomes for CS and WWTR students who used CTE tutoring services were not significantly different from the outcomes of students in these courses that did not use CTE tutoring services.

### Student Outcomes: Overall

The course retention rates and course success rates for CTE students who used the Tutoring Center were significantly higher than for CTE students who did not use the Tutoring Center ( $\chi^2 = 28.3, p < .001$  and  $\chi^2 = 23.1, p < .001$ , respectively).

Cuyamaca College  
**CTE Tutoring: Computer-Aided Drafting and Design (CADD)**  
 Fall 2012 - Spring 2013

**Summary of Findings**

- Overall, CADD students that used CTE tutoring services had significantly higher course retention rates than students in these courses that did not use CTE tutoring services ( $\chi^2 = 4.7, p < .05$ ), whereas course success rates were higher but the difference did not reach statistical significance ( $\chi^2 = 3.5, p > .05$ ).
