Page 1: Please submit one form per request.

Q1 Contact Person

Name **Caitlin Tems**
Email Address **caitlin.tems@gcccd.edu**

Q2 Department

Earth Science (Science and Engineering)

Q3 Fiscal Year of Request **2019-2020**

Q4 Title of Request

White Board for Classroom

Q5 Location of Request

H-224

Q6 Description Please provide a brief description of the space or items being requested.

Currently there is an old chalk board in the Earth Science classroom.
We would like the chalk board replaced with a white board.

Facilities Request Form

Q7 Please provide the justification for the request, discussing the following: How will the request (and associated program review goal) support the College's mission and strategic priorities? Does the request address any health, safety, or security issues? If so, please describe them. What do program or service area data indicate with regard to growth in increased demand for services? How will the request advance the continuous quality improvement of the department or work area?

The Earth Science Program, like the mission of the College, serves a diverse community of students who benefit from a wide range of educational opportunities in the Geology, Geography and Oceanography disciplines. The Earth Science Program has been rebuilt in the last few years to promote economic, civic and cultural development of the students by introducing students to jobs/careers in Earth Science fields, incorporating the intersection of Earth's system and human impact and culture, and encouraging active participation in civic responsibilities. The redevelopment of these courses has led to the incorporation of innovative active learning techniques and the utilization of technology in the classroom. Some of the equipment and learning tools that are available in the Earth Science classroom are outdated and need to be updated to support the courses. The most significant update that is needed is classroom white board to replace the old chalk board that is currently in the classroom. Students and instructors alike have provided feedback that the chalk board reduces student engagement and motivation in the classroom. The current chalk board leaves significant residue behind when information is erased making it difficult to fully utilize the chalk board in classes and makes unpleasant screeching noises when written on with chalk. With the redevelopment of the program, enrollment is increasing and there is a higher demand for Earth Science courses and updated facilities to promote student success.

Q8 What is the estimated one-time cost of the request?

3000
