A Student-Centered  
Guided Pathways Model

Ongoing  
partnerships  
between  
Student Services  
and Instruction

"The purpose of the Career and Student Employment Center is to educate students, alumni and community members in the career development process. This process includes gaining **self-knowledge**, exploring **career options**, and **developing skills** and a **plan of action** to realize individual career goals throughout their life-span. In partnership with counselors, faculty and support staff, the center provides students a means of **exploring majors and career options**. The Student Employment office assists students and alumni to develop employability skills, and to find **meaningful employment**. The Center fosters collaborations with employers and community groups to provide the link to "real world" **work opportunities** and assists students to achieve their employment goals."
