Provided details::

1. Health and Safety • Provides improved treat access to injured and rehabbing athletes. • Traditional tables are too wide for double-sided treatment requiring injured to move extensively • Variable height adjustment provide better treatment angles for differing injuries • Three-fold allow slant treatment for edema • Provides safer work environment for staff  
2. Equipment replacement and duplication • Replacement of 2 out of the 4 older tables  
3. Critical need • Will provide treatment positioning for both the student-athlete and the Athletic Medicine staff.  
4. Program expansion/innovation • Remove the need for bolsters or random items to be used to prop up student-athlete or their limbs. • Will provide for better treatment modalities to be used with appropriately heighted and stable platforms.  
5. Impact on student success and access • Better treatment and recovery times for injured athletes

**Q11** Program Goal: Please identify the program goal(s) this request would help your program achieve and provide a brief explanation of how it would do so.

Goal 1. Create state of arts athletic facilities to support department's needs for innovation.

These treatment tables will provide updated equipment to better serve the needs of our injured student-athletes and staff. It is important that all students feel that their needs are being addressed by staff that has the appropriate resources. Our Athletic Training staff has been relying on outdated equipment to serve the student-athletes. This "can do" and make it work" mindset is great when the appropriate equipment is unavailable, but what message does it send? Student-athletes, as would you, would doubt their level of care when they are having body parts propped up on random items in the room so they can be treated at an appropriate height. These adjustable tables will better allow for students to be treated and staff to be appropriately stable to prevent
